

# Sunbather Winter Covers

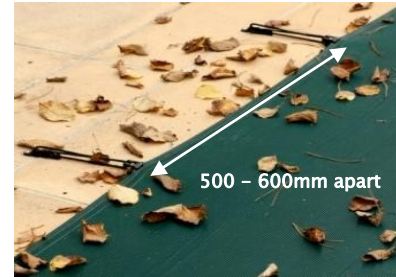

Sunbather

## Winter Cover Installation Guide

### How to Install

To perform the installation you will need:

- Tape measure
- Drill Hammer function
- 3/8 Masonary Drill Bit

1. Lay the cover flat over the pool.
2. Attach the attachment cords if not already done at 500 - 600mm intervals.
3. Using care, drill at 500-600mm intervals around the pool cover, approx 500mm from the pool edge. Certain types of paving will not require the hammer function on your drill.
4. Insert the sleeves into the paving or pool surrounds. You will have to tap them in with a hammer.

Once the plugs are in the pool surrounds, follow the diagrams below:

5. Drop the stainless steel screw into the plug (A). You do not need to screw them in.
6. Start by circling the pool and pulling the cords approximately 90% tight. Then complete another lap of the pool and tighten again to ensure the cover is suspended.

### Care & Maintenance Guide

A Winter Cover requires care and maintenance to achieve maximum life and to uphold the warranty. The following are recommended maintenance steps:

1. When off the pool, always store the cover in the special bag provided out of direct sunlight and in a cool dry place.
2. Before folding and placing in the bag, allow the cover to dry.
3. To prevent cover damage, do not drag over abrasive pool surrounds or sharp surfaces
