

## **Sunbather Attachment Kit Instructions**

- 1.** Using a pencil, draw a straight line across the width of your blanket at least 50mm from the end of the cover.
- 2.** Now mark where you intend to punch each hole for the attachment straps. They should be evenly spaced no more than 500mm apart and 50mm in from each edge.
- 3.** Take the metal punch supplied and using a hammer, tap the bevelled end of the punch into the marks you previously made on the cover.
- 4.** Remove the black paddle from the loop at the end of the attachment strap. Slide off the blue eyelets. Repeat for all straps.
- 5.** Place the male half of the blue plastic hexagon eyelet underneath the cover and place the female section on top of the blanket and tap together lightly with a hammer. Repeat for all holes.
- 6.** Insert the attachment strap loop (where you previously removed the paddle from) through the blue plastic eyelet.
- 7.** Replace the black paddle through the loop to secure. Repeat for all straps.
- 8.** Using a pencil, draw a straight line along the roller. Using a drill, make 4mm holes in the roller to match the location of the blanket attachments.
- 9.** Make a hole in the end of each of the attachment straps with the metal screws provided.
- 10.** Place the screw through the washer and screw over the attachment strap into the holes on the roller. (Trapping the webbing between the washer & roller).
- 11.** You may have also purchased a haul cord. This is to be attached in the centre of the cover at the opposite end to the roller, at least 100mm away from the edge, using the blue eyelets as described above.
